2

What is Microsoft 365 Copilot?

The Microsoft 365 Copilot system

- Represents a new work paradigm, fostering collaboration between AI and employees
- Aims to transform work in the digital age
- Powered by LLMs and utilizes Microsoft Graph data
- Offers seamless integration with Microsoft 365 suite

Trusted data security

- Offers real-time access to Microsoft Graph for generating responses ingrained in business content
- Navigates and delivers precise, contextually aware responses aligned with ongoing work
- Rests on Microsoft's comprehensive security, compliance, and privacy approach

3

What is Microsoft 365 Copilot? (Continued)

Be Microsoft 365 Copilot ready

Before you can access Microsoft 365 Copilot, you must meet the following requirements:

- Microsoft 365 Copilot requires a prerequisite base license assigned
- Microsoft Entra ID-based account required for authentication
- OneDrive account that enables Copilot to collaborate on content
- Microsoft 365 Apps must be deployed

4

Explore how Microsoft 365 Copilot works

Understands context and user needs

Excels in understanding user needs by analyzing content, gaining personal insights, and real-time monitoring.

Transforms how you work

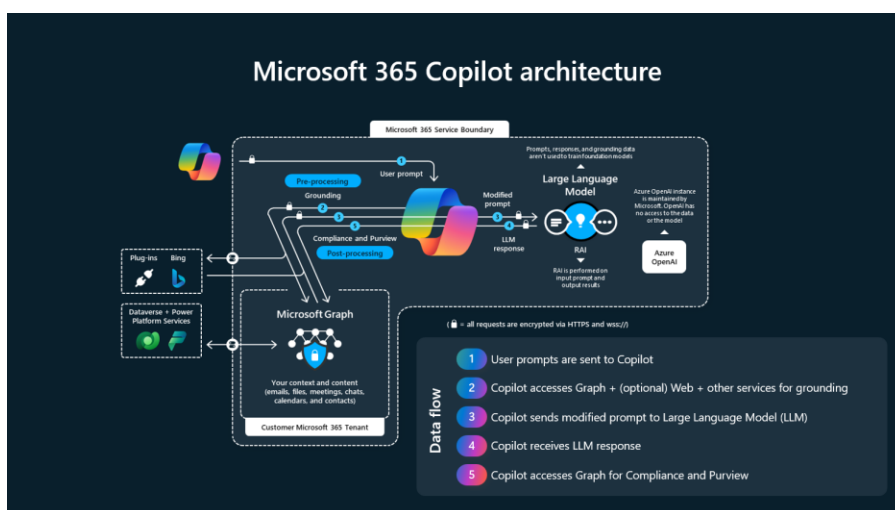

Takes action through powerful search, natural phrasing with LLMs, and refined recommendations.

Offers key capabilities

Optimizes work efficiency through enhanced engagement, streamlined communication, and robust support for writing, presentations, data analysis, security, and user control.

5

Explore how Microsoft 365 Copilot works (Continued)

6

Explore the core components of Microsoft 365 Copilot

LLMs

- Specialize in understanding and generating human-like text
- Operate as generative AI, producing new content
- Provide the engine that drives Copilot capabilities
- Privately hosted on the Azure OpenAI Service

Natural Language Processing (NLP)

- Key AI technology for machines to understand, interpret, and respond to human language
- Components include Tokenization, Semantic Analysis, Sentiment Analysis, and Language Translation

Microsoft 365 Apps

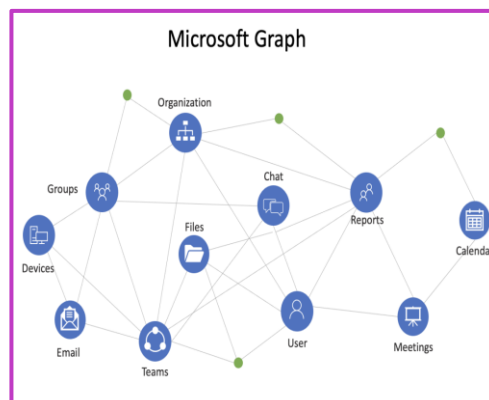

- Collaborate seamlessly with Copilot, enhancing user support across the entire Office Suite
- For example, Microsoft 365 Copilot in Word specifically assists users in the process of creating, comprehending, and editing documents

7

Explore the core components of Microsoft 365 Copilot (Continued)

Microsoft Graph

- Unifies Microsoft 365 services and data through a central API endpoint
- Enables Copilot to leverage Microsoft Graph and the Semantic Index to synthesize and search tenant content
- Ensures secure, compliant assistance aligned with user permissions

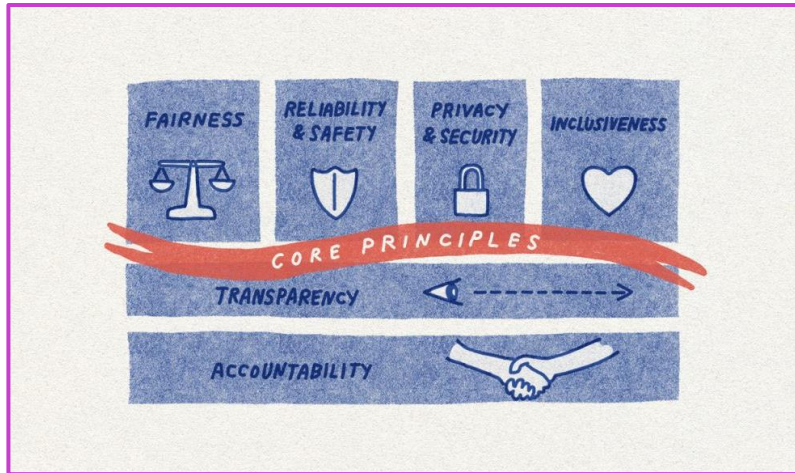

Copilot Chat

- Secure, AI chat grounded in the web and powered by the latest models
- A side-by-side experience that's aware of a user's open content in select Microsoft 365 apps like Word, Excel, PowerPoint, OneNote, and Outlook
- Features include Copilot Pages, file upload, and image generation

15

How Copilot Chat works

Integration of data sources

Copilot Chat integrates data from various sources to create a unified information hub for users.

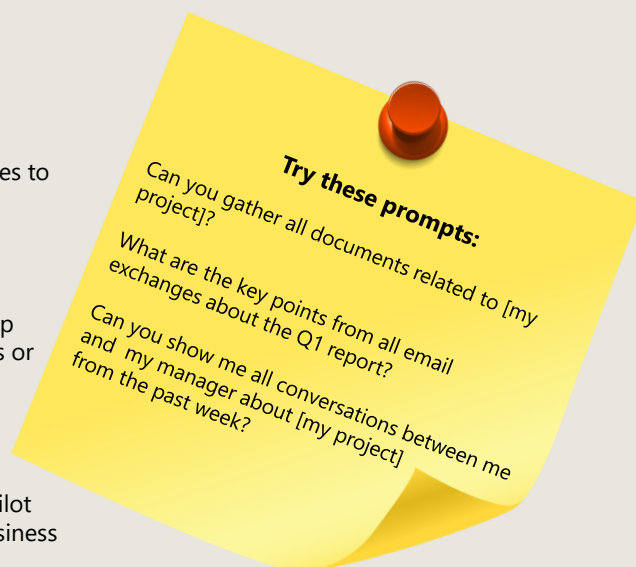

Contextual insights

Copilot Chat provides contextual insights to help users make informed decisions during meetings or document preparation.

Efficiency in communication

By integrating and organizing information, Copilot enhances the efficiency and effectiveness of business communication.

16

Continuous improvement

Learning from interactions

Copilot Chat learns from user interactions to improve its accuracy and personalization over time.

Feedback integration

User feedback is essential for Copilot Chat to refine its responses and enhance user experience.

Adaptive assistant

The more you use Copilot Chat, the better it adapts to your communication style, becoming an effective assistant.

17

Work mode vs. web mode – what's the difference?

Work mode

Grounded in work data

In work mode, Copilot Chat utilizes your Microsoft 365 data for personalized responses and task management.

Task management

Copilot Chat enables you to manage and complete various tasks related to your work effectively.

Collaboration tools

Collaborate with colleagues using tools like email, documents, and calendar management directly within Copilot Chat.

Web mode

Web mode functionality

Web mode utilizes the Bing search index for real-time data, facilitating research and resource discovery.

Seamless workflow transition

The design allows easy switching between work tasks and web-based information, enhancing productivity.

Security and compliance

Both work and web modes provide enterprise-grade security, ensuring data privacy and compliance with regulations.

19

Work mode functions

Task management

Copilot Chat assists in managing tasks, emails, and missed meetings effectively through the Teams interface.

Data security

Microsoft Copilot Chat employs strict privacy rules and advanced security measures to protect your data and access.

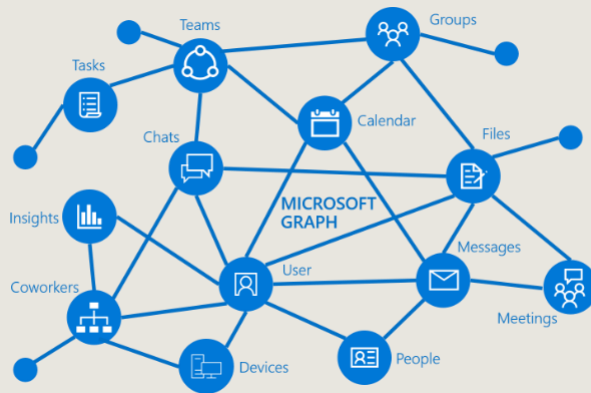

Contextual insights

Prompts in Copilot Chat are grounded in the LLM and contextualized with business data, providing relevant insights.

20

Role of Microsoft Graph

© Copyright Microsoft Corporation. All rights reserved.

Connective tissue of Microsoft 365

Microsoft Graph binds all Microsoft 365 services and user data, creating seamless integration across applications.

Synthesis of user data

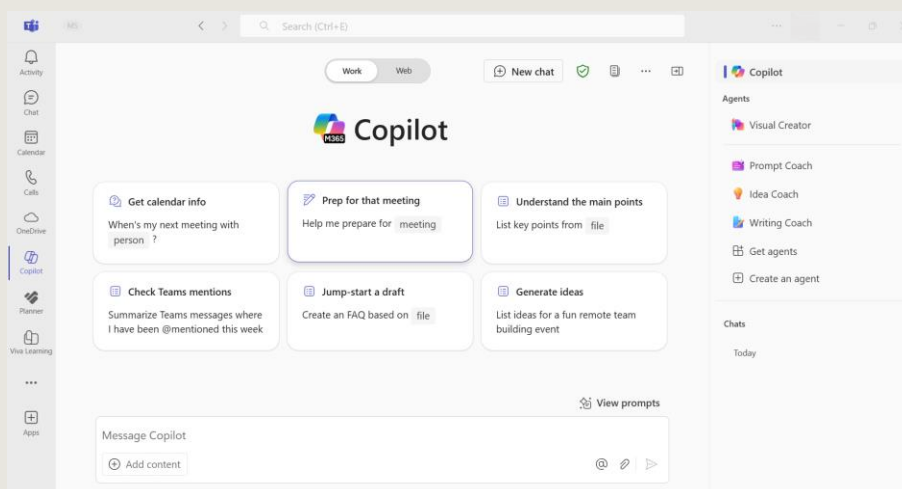

Microsoft 365 Copilot leverages Microsoft Graph to synthesize data from multiple sources within an organization.

User permissions and security

Microsoft Graph ensures that responses are generated based on user permissions, maintaining data security and compliance.

22

How can I use Copilot Chat in work mode?

Possible use case prompts

Help me prepare for my meeting by summarizing emails and chats with [a name]

Summarize all emails and Teams chats in the past day. Highlight the primary asks and open items.

Draft a message to my team with the current status of [project name] based on the emails and Teams messages received in the last 48 hours.

What is the next milestone on [a project]? Are there any risks? Help me brainstorm a list of potential mitigations for these risks.

Streamline communication

Copilot Chat helps streamline your communications, making it easier to manage messages and stay organized.

Summarize emails and chats

Use Copilot Chat to summarize emails and chats, ensuring you stay informed and prepared for your work.

Prepare for meetings

Prepare for meetings by using Copilot Chat to gather relevant information and summary insights from previous communications.

Draft updates

Generate updates for your team that summarize progress and project status with the assistance of Copilot Chat.

23

Maximize your productivity with web-grounded data

© Copyright Microsoft Corporation. All rights reserved.

24

Benefits of web mode

Streamline your workflow

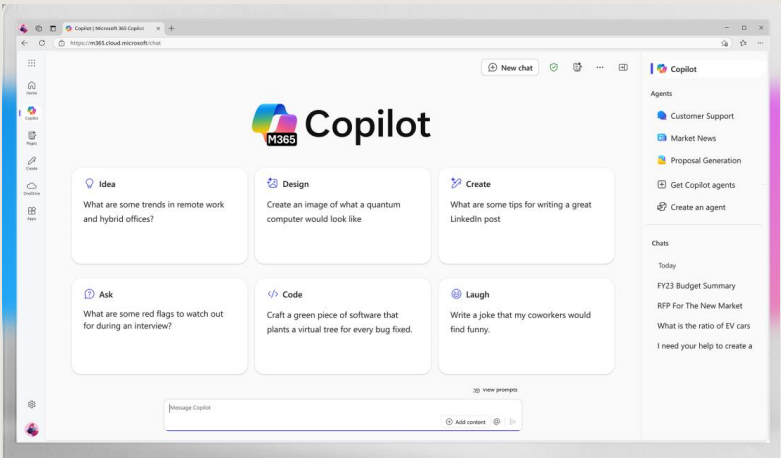

Copilot Chat enables users to streamline their workflow, making data-driven decisions easier and more efficient.

Summarize and analyze data

With file uploads, users can analyze data in Excel or summarize documents in Word, enhancing productivity.

Enterprise-grade security

Copilot Chat ensures enterprise-grade security with encryption, protecting your information both in transit and at rest.

26

Finding information on the web (continued)

Let Copilot Chat help with	Using these prompts
Content creation	What types of posts perform best on [chosen social media platform]? Provide examples of tone, style, and content themes that resonate with this platform's audience. Write an introduction for an article on innovative communication strategies. Can you help me draft a blog post about [specific topic] by pulling relevant information from the web?
Competitive analysis	Can you gather recent news and updates about the activities and strategies of [Competitor Name]? What are the latest product launches and innovations from [Competitor Name]? What are the strengths and weaknesses of [Competitor Name]'s product offerings compared to ours?

© Copyright Microsoft Corporation. All rights reserved.

27

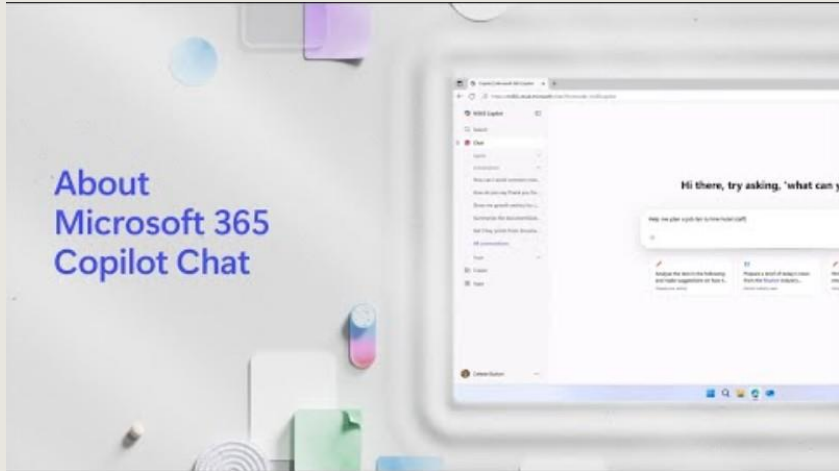

Finding information on the web (continued)

Let Copilot Chat help with	Using these prompts
Learning and development	Can you find the latest research papers on [specific topic or field]? What are some recent articles discussing advancements in [specific industry or subject]? Can you provide a list of tutorials for learning [specific skill or technology]? What are the most recent publications and studies related to [specific area of interest]?
Project management	Provide a checklist for launching a new product. Can you find project planning templates for [specific type of project]? What are some best practices for managing [specific type of project]?

30

Why is prompting important?

Prompt quality

The quality of the prompt you provide to Copilot significantly impacts the accuracy and relevance of the responses you receive. A well-crafted, detailed prompt can lead to more precise and useful answers, while a generic prompt may result in vague or less helpful responses.

Common prompts

With Copilot, content creators can draft articles more efficiently and manage their workload effectively.

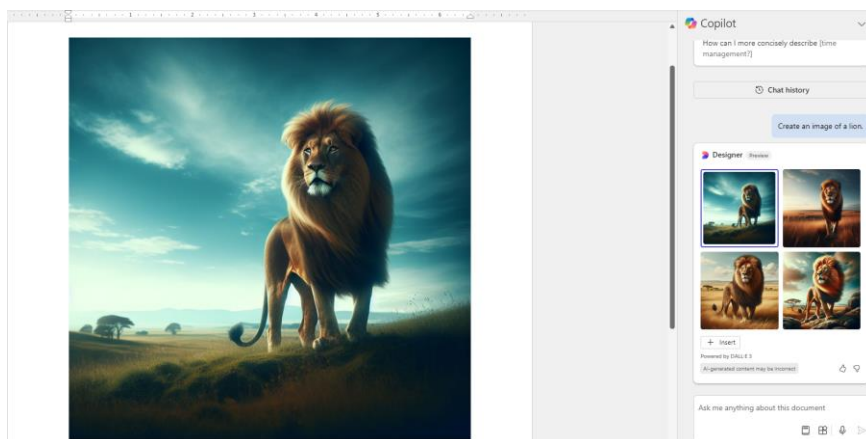

Drafting with Copilot

The feature allows users to draft content directly within Microsoft Word, simplifying the writing process.

© Copyright Microsoft Corporation. All rights reserved.

31

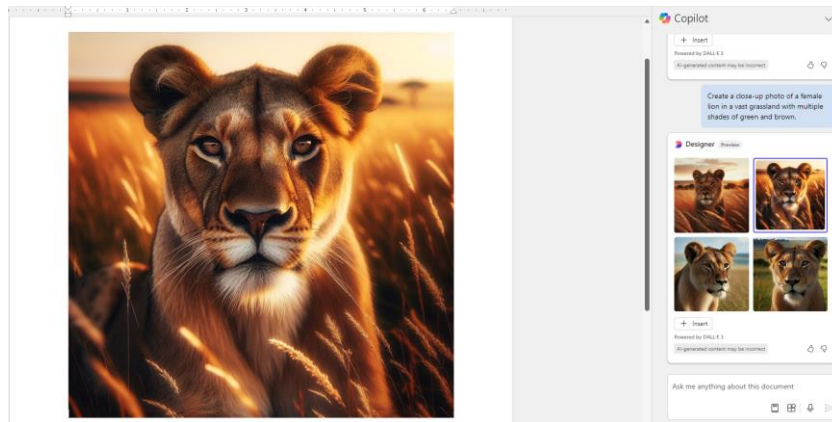

Create image with Copilot

Create an image of a lion.

32

Create image with Copilot

Create a close-up photo of a female lion in a vast grassland with multiple shades of green and brown.

33

Try this

- *Write a proposal for a new flavor in the Fourth Coffee latte lineup.*
- *Write an article on the importance of creating work/life balance.*
- *Write a white paper about project management.*
- *Write a job offer letter for a sales position at Contoso. The start date is August 1st, and the salary is \$60,000 per year plus bonuses.*

34

Start a new presentation from scratch

Select from the suggested prompts

Copilot in PowerPoint presents prompt suggestions that you can use to begin your draft.

Enter your own prompt

Using the prompt box, you can tell Copilot your exact needs.

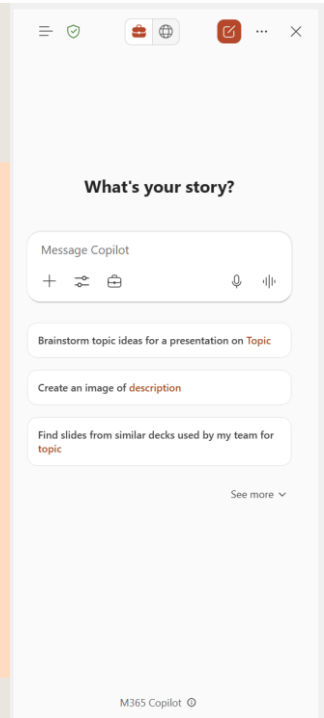

Sample prompts

Create a presentation on the benefits of remote work.
 Generate a presentation about the latest trends in digital marketing.
 Design a presentation on the impact of artificial intelligence in healthcare.
 Create a presentation on the importance of cybersecurity in the modern workplace.
 Generate a presentation about sustainable business practices.

Be specific & reiterate

The more details you provide in your prompt, the better Copilot's response can be.

35

Organize and summarize your presentation

Organize your presentation

You can ask Copilot to *Organize your presentation*. It organizes the slides into sections and then adds section heading slides. If you are not satisfied with the organization, you can easily undo the changes made by Copilot.

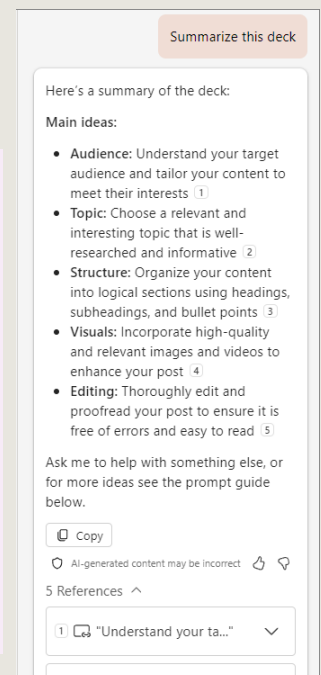

Use Copilot for summaries

Copilot can analyze your slides and generate concise summaries, highlighting key points and action items. This feature is valuable for quickly understanding the main takeaways of lengthy presentations or preparing executive summaries.

Sample prompts

- Rearrange the slides to follow a logical flow from introduction to conclusion
- Group related slides together under appropriate section headings.
- Generate an overview slide that outlines the agenda and main sections of the presentation.
- Add a slide that summarizes the key data points and statistics from the financial overview section.

36

Prompt examples

Prompt	Prompt Type	Potential Output
Summarize this document.	Generic Prompt	A brief summary that may miss some key points or nuances of the document.
Summarize the key points of the first three sections of this document, focusing on the main objectives and outcomes discussed.	Detailed Prompt	A comprehensive summary that highlights the main objectives and outcomes of the first three sections, providing a clearer understanding of the document's content.
Rewrite this paragraph.	Generic Prompt	A rephrased version of the paragraph that may not fully capture the intended tone or emphasis.
Rewrite this paragraph to make it more formal and emphasize the importance of the project's timeline.	Detailed Prompt	A rephrased paragraph that is more formal and clearly emphasizes the importance of the project's timeline, aligning better with the intended tone and focus.

Ask Copilot to calculate it (continued)

You can ask Copilot to create a formula, or to present the formula's result visually. Try some of these prompts:

Formula	Present a formula's result visually
Calculate the total sales for January.	Create a bar graph showing the sales growth between Q2 and Q3.
Find the average monthly revenue for the first quarter.	Sum the sales for all products in category 'A' and display the results in a pie chart."
Calculate the percentage increase in sales from January to February.	Calculate the Net Present Value (NPV) of a series of cash flows with a discount rate of 5%.
Retrieve the price of [product ID 12345] from the product list.	Calculate the NPV of a series of cash flows with a discount rate of 5% and display the cash flows in a scatter plot.
Calculate the Net Present Value (NPV) of a series of cash flows with a discount rate of 5%.	Retrieve the price of product ID 12345 from the product list and display it in a table.

Create custom functions using Copilot in Excel

Understanding custom functions

Custom functions let you create reusable formulas tailored to your needs, simplifying calculations and automating tasks.

Creating custom functions

Use Copilot to describe the custom function you want, making it easy to generate tailored solutions.

Inserting and using functions

Insert the generated function into your workbook and use it in your worksheet to validate its performance.

Editing custom functions

Refine your custom function by editing directly in the formula bar or by re-prompting Copilot.
